Cooperation Partners
exploring Austria’s culture through the language glass

CORE THEMES

- e-lexicography
- visual analysis tools
- citizen science
- social innovation
- open science

development of specialised focus groups
• Web-based, collaborative, multilingual, domain-tuned IT infrastructure

• exploitation and linking of data through semantic web

• archiving, editing, analysing non-standard data and lexicographic output

• facilitate scholarly and amateur inquiry

• explore the data with interactive visual tools

include linked knowledge from European and global infrastructures → embed in existing infrastructures

Semantic search engine

exploring Austria’s culture through the language glass
exploring Austria’s culture through the language glass

- include **linked knowledge** from European and global infrastructures → embed in existing infrastructures
- embed data to infrastructures
- develop sustainable workflows
- ensure interoperability and open access data

**KEY STEPS**
